- If there is time for questions for the panelists at the end of the session, enter them by using the Q&A button located on the tool bar at the bottom of your screen
- All attendees are muted

WE WELCOME

CAL MARITIME

Our Hometown California State University

MADE IN THE CSU

We're more than a trade school...
we're a maritime university!

- Adapting to rapid and constant change
- Preparing graduates for a global profession
- Delivering a well-qualified pool of sea-going officers and shoreside intermodal transportation policy and logistics experts
- Positioning California for economic vitality in America's Pacific Century

*“The sea is huge and it is always changing. Its many moods and unending motion are **unforgiving** of human weakness and constantly place great stress on people and equipment”*

Our Mission

- Train, educate and develop graduates for positions of **progressively challenging leadership** in the global maritime profession
- Serve as the 24/7/365 resource leader in maritime subject matter expertise for business, government and education

Everyday, we are creating the leaders who run the American maritime profession.

Great performances are achieved
through painstaking practice.

**YOU ARE EITHER
GETTING BETTER
OR GETTING WORSE**

**NOTHING STAYS
THE SAME**

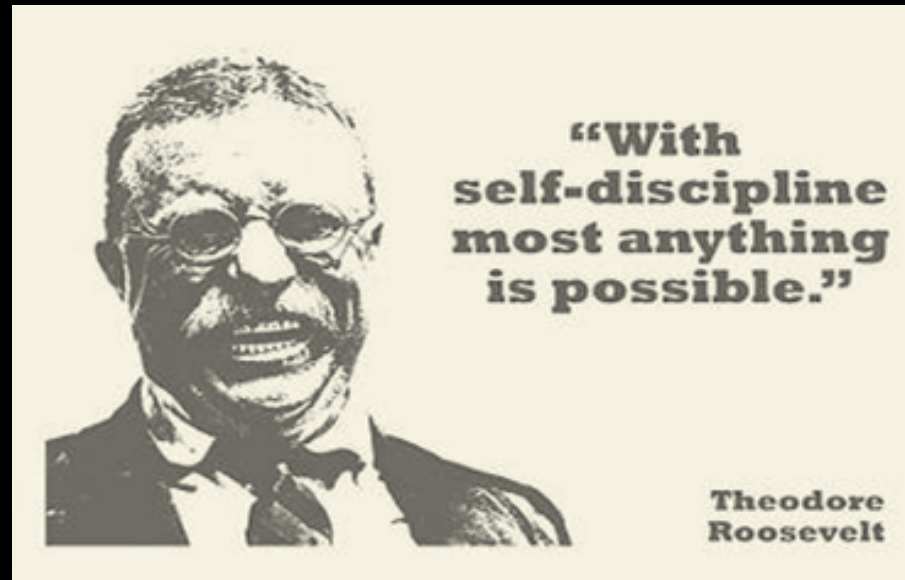

What's our secret?

- Create the “Wow” Factor
 - Integrated curricular, co-curricular, extra-curricular programming
 - A significant early advantage that results in Cal Maritime graduates leading the profession in 25 years
- Scanning the external environments to ensure we remain relevant
 - Trends, disruptions, needs...2021-2050
 - Class of 2025 will be leading the profession in 2050
- Everyone is an educator... every one of us.
 - We teach our cadets much by our living example

Timeless values learned at Cal Maritime

Teamwork...Trust...Reliability...and perhaps the most difficult but most important to learn...

Our purpose is to get cadets to internalize the values, behaviors and mindset that will prepare them for incredibly successful careers... anywhere. If these need to be constantly imposed on someone, that person will fail in the maritime profession... and likely fail elsewhere.

Why Cadets Succeed at Cal Maritime

- I'm here because this is my choice, not someone else's
- I thrive in structure, I don't complain about uniforms or grooming standards.
- I show up early, I pay close attention, I am focused on this minute, later today, tomorrow and my future.
- I learn quickly from my mistakes, I don't repeat them.
- I don't make excuses, I find solutions.
- I am a reliable teammate, I lend a hand, I ask for help.
- I appreciate how hard my faculty, staff and leaders are working to create the conditions for my success.
- I am in charge of me... all the time.

Are you ready to be part
of something great?
