- John Wang, Engineering Operations Technician
wngjo@amazon.com

Launched in 2006, Amazon Web Services (AWS) began exposing key infrastructure services to businesses in the form of web services -- now widely known as cloud computing. The ultimate benefit of cloud computing, and AWS, is the ability to leverage a new business model and turn capital infrastructure expenses into variable costs. Businesses no longer need to plan and procure servers and other IT resources weeks or months in advance. Using AWS, businesses can take advantage of Amazon's expertise and economies of scale to access resources when their business needs them, delivering results faster and at a lower cost.

Today, Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world. With data center locations in the U.S., Europe, Singapore, and Japan, customers across all industries are taking advantage of our low cost, elastic, open and flexible, secure platform.

Ameresco, Inc.

111 Speen Street, Suite 410
Framingham, MA 01701

www.ameresco.com

Sr. Talent Acquisition Partner
206-708-2831, scolletto@ameresco.com

Driven by a high-caliber workforce, Ameresco is a leading clean technology integrator and renewable asset developer, owner and operator. Our comprehensive services include energy efficiency, infrastructure upgrades, asset sustainability and renewable energy solutions throughout North America and Europe. Our renewable energy assets and customer projects have delivered a cumulative carbon offset equivalent to over 60 million metric tons of carbon dioxide since going public in 2010.

Grounded in our C.A.R.I.N.G. values and guided by our Environmental, Social and Governance practices, we are proud of our engaging workplace with a host of competitive benefits and wellness programs. Our teams work collaboratively to deliver best-in-class solutions with a relentless focus on customer satisfaction. In pursuit of energizing a sustainable world, our people and purpose set Ameresco apart.

Help shape the future of energy by working for an award-winning team, honored to be recognized by agencies including Best and Brightest Companies to Work for in the Nation and Forbes for our company culture, industry leadership, and client projects. Ameresco is fueled by a dynamic team that embraces diversity, career development opportunities, and -- most importantly -- employees driven by doing well by doing good.

530-821-2074, drew.yarbrough@calpine.com
- Julie Venierakis
Sr. Human Resources Business Partner
925-557-2226, julie.venierakis.com

Calpine Corporation is America's largest generator of electricity from natural gas and geothermal resources with operations in competitive power markets. Its fleet of 76 power plants in operation and one under construction represents nearly 26,000 megawatts of generation capacity. Through wholesale power operations and its retail businesses, Calpine serves customers in 22 states, Canada and Mexico. Its clean, efficient, modern and flexible fleets uses advanced technologies to generate power in a low-carbon and environmentally responsible manner. The company was established on the premise that a strong commitment to the environment is inextricably linked to excellent in power generation and corporate responsibility. Since its founding in 1984 Calpine has led the power industry in its unwavering commitment to environmental stewardship. In addition, its renewable geothermal plants use steam generated deep below the earth's surface to produce clean, renewable electricity.

Chevron Shipping, LLC

6001 Bollinger Canyon Road
San Ramon, CA 94583

- Suzy Olafsson
HR Manning Representative
925-968-8896, suzy.olafsson@chevron.com

Chevron Shipping Company is the corporate marine center of expertise for Chevron operations and projects, providing safe, reliable and cost-competitive marine transportation, managing marine risk and providing operations, technical and commercial support to our customers.

We currently employ 1,625 seafarers and 325 shore-side personnel dedicated to supporting Chevron's marine requirements. Our operated fleet consists of conventional crude tankers and product carriers, as well as high-technology ships and liquefied natural gas (LNG) carriers. Shore-side staff provide critical marine functional support, with marine specialists embedded within Chevron business units in 20 different countries.

Crowley

904-727-2175, misty.montgomery@crowley.com
- Em Glavan
Recruiter, Labor Experience & Recruitment
904-727-2307, emily.glavan@crowley.com

Crowley, founded in 1892, is a privately-held, U.S.-owned and operated logistics, government, marine and energy solutions company headquartered in Jacksonville, Florida. Services are provided worldwide by four primary business units – Crowley Logistics, Crowley (Government) Solutions, Crowley Shipping and Crowley Fuels.

Crowley owns, operates and/or manages a fleet of more than 200 vessels, consisting of RO/RO (roll-on-roll-off) vessels, LO/LO (lift-on-lift-off) vessels, articulated tug-barges (ATBs), LNG-powered container/roll-on, roll-off ships (ConRos) and multipurpose tugboats and barges. Land-based facilities and equipment include port terminals, warehouses, tank farms, gas stations, office buildings, trucks, trailers, containers, chassis, cranes and other specialized vehicles.

CSU Maritime Academy Graduate Program

200 Maritime Academy Drive

Vallejo, CA 94590

www.csum.edu/grad

- Kathy Arnold
Graduate Program Coordinator
707-654-1271, karnold@csum.edu

CSU Maritime Academy prepares students for successful careers in the fast-paced and exciting fields of International Business, Logistics, Marine Engineering & Technology, Maritime Affairs, Global Studies, Transportation, and Transportation & Engineering Management.

The M.S. in Transportation & Engineering Management, with concentrations in Transportation, Engineering Management, and Humanitarian Disaster Management, is offered fully online to accommodate the busy schedules of working adults. Developed and delivered in close collaboration with business and industry, the curriculum provides a mix of theory and creative real-world applications to prepare students to succeed in a challenging and changing global market.

New this fall is the Graduate Certificate in Emergency Management. The Emergency Management Certificate focuses on risk assessment and decision-making processes in mitigation, preparedness, and adopted disaster response

actions at the local and national level, public-policy creation, and includes an emphasis on program evaluation within a research-based theoretical framework.

The Mission of the Monterey Bay Aquarium

From sea otters to seaweeds, our unique oceanfront location and timeless galleries bring the wonders of the ocean to life for our visitors. But beyond our exhibits, we are transforming what it means to be an aquarium.

The mission of the Monterey Bay Aquarium is to inspire conservation of the ocean!

We Inspire

Frolicking sea otters, fast-swimming sharks, pulsating jellies and waddling penguins — our world-class exhibits and breathtaking scenery instill a love of the ocean in our visitors. With over 200 exhibits and 80,000 plants and animals, the Aquarium is a window to the wonders of the ocean.

We act for the Ocean

Our exhibits are just one part of what we do. Our scientists are rebuilding sea otter populations, transforming fisheries and aquaculture around the world, and working to protect California's ocean. Our policy experts are moving the needle on legislation to address climate change and end plastic pollution. Our Seafood Watch team is shifting the global marketplace to make seafood more sustainable. Together we inspire people – from the public to politicians – to take action on some of the biggest threats to ocean health.

We empower young ocean leaders

Education is a top priority. Since 1984, more than 2.5 million students have visited the Aquarium for free. Our life-changing teacher and youth development programs are helping young people find their voices as ocean conservation leaders and will ensure a healthy future for the ocean."

Nationwide Boiler, Inc.

NextEra Energy is the largest renewables energy company in the world and one of the top-five investors in U.S. infrastructure.

With a market capitalization of more than \$100 billion, we are the world's largest utility company. We're proud to be built and based in America.

We generate more wind and solar energy than any other company in the world.

We're among America's largest capital investors in infrastructure, and we're planning to invest between \$50 and \$55 billion through 2022.

We're creating thousands of high-paying American jobs through our energy investments.

We're recognized among the "top 25 in the world for innovation," according to Fortune magazine.

Professional Maritime Recruiter
1-833-SAILUSA, carol.martin@noaa.gov

The National Oceanic and Atmospheric Administration (NOAA) roots date back to 1807, when the Nation's first scientific agency, the Survey of the Coast, was established. Since then, NOAA has evolved to meet the needs of a changing country. NOAA is a scientific agency providing information and data about life on earth, our oceans,

atmosphere, and the Nation's living marine resources. NOAA's programs range from marine sanctuaries, environmental satellites, global climates changes, and ocean exploration initiatives to climate, weather, and water services.

NOAA ships play a critical role in the collection of oceanographic, atmospheric, hydrographic, and fisheries data. The NOAA fleet is managed and operated by the Office of Marine and Aviation Operations (OMAO), an office composed of civilians and officers of the NOAA Commissioned Corps.

OMAO's research and survey ships compose the largest fleet of federal research ships in the nation. The fleet ranges from large oceanographic research vessels capable of exploring the world's deepest ocean, to smaller ships responsible for charting the shallow bays and inlets of the United States. The fleet supports a wide range of marine activities including fisheries research, nautical charting, and ocean and climate studies.

About Norton Lilly International

Being one of the largest providers of agency services in North America means Norton Lilly is capable of offering a wide range of services for numerous vessel types. We specialize in providing port services and logistics for bulk, tanker, reefer, liner and passenger vessels in the oil, gas, breakbulk, dry bulk, container and cruise industries. This also means that our customers are assured a wide range of domestic and international support with service to over 70 ports through 39 offices in the United States, and our offices in Panama, Canada, Mexico, Venezuela, Barbados, and Trinidad. We can handle your vessels globally through our business partners, S5. But, this is monitored from our offices in the US.

Throughout our history, Norton Lilly has dedicated itself to a philosophy of fostering a safe and motivated workforce to ensure the highest level of quality for our customers. Our commitment to this philosophy is shown by implementation of our own Quality Policy, along with obtaining ISO 9001-2008 certification. Norton Lilly's Quality Management Team has over 100 years of maritime experience and have individually received their Auditor/Lead Auditor Certification.

To remain the premier shipping agency in the Americas, we know it is vital to evolve with the industry, and we know that safety and environmental issues are at the forefront of the shipping industry's future.

NuStar Energy L.P.

In 2020, nearly 4 million tons of cargo moved through the Port of Stockton (also known as Stockton Port District), and that number grows nearly every year. We work with upwards of fifty-five different countries, with goods flowing in both directions. On any given day here at the Port you might see organic grain coming in from Turkey, refined sulfur going out to Australia, or any other of a litany of products that are going to or coming from places all around the world. And of course we do business domestically as well. We regularly work with people all across the U.S., especially right here in the fertile Central Valley of California.

Because here at the Port of Stockton we are very proud to call the Central Valley our home, and we are equally aware that we would not be around today without the hard work and generous help of our neighbors. As such, giving back to the community is always on our minds, and we are eagerly committed not just to commerce, but to both continued job growth here in the area, and also to going above and beyond to protect our local environment. The Port of Stockton was built by Californians and we are California proud!

San Francisco Police Department

1245 3rd Street

San Francisco, CA 94158

www.sfpdcareers.com

- Officer Moli Finau
415-660-8641
- Officer Lorean Jeminez
- Officer Destinee

Join the SFPD – and be part of San Francisco’s finest! San Francisco is a world-class city with a world-class police force. From Fisherman’s Wharf to Golden Gate Park and from Nob Hill to the Tenderloin, whether we’re on foot patrol, horseback, or in squad cars, investigating felonies, responding to emergencies, or leading classes on public safety, we’re working with you to help keep our community safe.

Minimum Qualifications:

- Be 21 years of age. (There is no maximum age limit.)
- Have not been convicted of a felony crime.
- Have not been convicted of an offense involving domestic violence.
- Have not been convicted of any misdemeanor, which carries a penalty of prohibiting ownership, possession, or control of a firearm.
- Be a U.S. citizen.
- Have a U.S. High School Diploma, have passed a G.E.D. or the California High School Proficiency exam.
- Have a valid driver’s license to operate an automobile.

The Police Officer Testing Components:

- A written examination will test 3 components: written language ability, reading ability and public relations.
- A physical ability examination that measures strength, endurance, equilibrium and flexibility.
- An oral interview that tests oral communication, problem solving and interpersonal skills.
- Candidates who pass the three-part Police Officer examination process move on to the Background Investigation process. The Background Investigation process consists of:
 - Personal History Questionnaire (PHQ) Evaluation
 - Employment, Character and Background Investigation
 - Review of Judicial and Driving Records
 - Testing for Use of Controlled Substances
 - Medical Examination that includes a vision test, a hearing test and height/weight measurements.
 - Polygraph Examination
 - Psychological Examination

Apply at SFPDCAREERS.COM

The San Francisco Police Department is an Equal Opportunity Employer. Discrimination of any kind is prohibited in all areas of employment, including recruitment, hiring, training, promotion, compensation and benefits.

Deckhand
rylee.ettinger@gmail.com

Shaver Transportation Company was founded by George W. Shaver in 1880. The Shaver family continues to own and manage the business today. Captain Steve Shaver serves as President and Chairman of the Board. Steve's sister, Samantha Shaver is a Board Member and VP of Marketing. Steve's daughter, Rickie Shaver, who serves as an Assistant Purchasing Agent, represents the sixth generation of Shavers at the Company. Together with our employees Shaver has grown into a regional tug and barge company with a fleet of 15 tugs and 20 barges. Shaver is the oldest continuously operating family-owned company on the west coast. We focus our efforts on four lines of business: ship assist, bulk commodity transportation, harbor/marine services, and emergency response and rescue. Our mission is to provide safe, reliable, and innovative marine transportation services and solutions on the Columbia Snake River System, while focusing on our customers and employees.

Siemens Industry, Building Technologies, Automation

We spend up to 90% of our lives in buildings, and we believe that everything people do in life deserves a perfect place to do it. In a world where our fundamental health, safety and wellbeing expectations have been deeply impacted with the anxiety of a new virus, buildings should offer a haven. Ideally, a perfect place to grow, learn and prosper.

While it's true today's buildings should be reliable, efficient and safe - these characteristics alone don't enable businesses and empower people the way a true smart building can. Adaptability is crucial. Smart buildings interact with people, systems and external elements around them. They learn from the past experiences and real time data input. They adapt to the needs of people and the businesses within them by increasing comfort, efficiency, resiliency and safety.

Whatever the size of the building, it's purpose or application: Our comprehensive building automation and control systems portfolio allows us to perfectly tailor an automation and control solution to each project's individual needs. Openness and flexibility are the bottom line for all of our systems. As a result, open communication protocols enable their easy integration with other systems and the option to modernize later on. Combining electrical and HVAC systems in a comprehensive, multiple discipline approach and designing for reliability - this is how perfect places become a reality.

Siemens Energy

4400 Alafaya Trail

Orlando, FL 32826

<https://www.siemens-energy.com/us/en.html>

“Let’s make tomorrow different today” is our genuine commitment at Siemens Energy to all customers and employees on the way to a sustainable future.

In our Business Unit Generation, we offer a broad portfolio of cutting-edge technologies, services and solutions for centralized and decentralized energy production.

Our Field Service organization travels to power plants across the U.S. and where our employees are responsible for the maintenance and upgrades to some of the largest and most powerful electrical generation machinery in the world including gas turbines, steam turbines and generators.

MORE INSIGHTS

Be Energized. Be you.

Lucky for us, we are not all the same. Through diversity we generate power. We run on inclusion and compassion. Our combined creative energy is fueled by at least 130 nationalities. Siemens Energy celebrates character – no matter what ethnic background, gender, age, religion, identity, or disability. We energize society. All of society.

SSA Marine

1131 SW Klickitat Way

Seattle, WA 98134

www.ssamarine.com

- Erica Orr
Communications Program Manager
erica.orr@ssamarine.com

With marine terminal and rail yard operations in more than 250 strategic locations around the world, SSA Marine is unmatched in skill, experience and productivity. Because we believe in making intentional investments in our people, places and practices that optimize customer service and efficiency at every handling point.

It begins with our greatest assets: our employees. We provide proprietary training that raises job proficiency and fosters creative thinking. In turn, customers reap the benefits of a tenured, highly productive workforce that delivers shorter turn times, responsive service, and the confidence that cargo is being handled with the greatest care and efficiency.

We continually strive to improve and expand our operations – developing new marine, rail and ancillary services, as well as advancing technical innovations to streamline vessel throughput and reduce time in port.

By expanding our reach and capacity, modernizing our processes, and developing our employees, we drive prosperity for our customers around the world.

As an MEP building systems expert, we provide integrated, full lifecycle solutions that optimize the design, construction, operation, and efficiency of buildings.

We think outside the box to make inside environments better.

We partner with our clients and leverage the collective expertise of our people to create better built environments. By thinking big to account for the whole picture, our engineering, construction, service, and energy solutions deliver results that will work for you, your building, and your business or community.

SUNY Maritime College

6 Pennyfield Avenue
Throggs Neck, NY 10465
<https://www.sunymaritime.edu/>

- Marissa Santomaso
Assistant Director of Graduate Admissions
718-409-7201, msantomaso@sunymaritime.edu

Our campus is located in New York City, one of the most exciting cities for the entertainment, the financial district, greatest global marketing center of the world and most importantly essential hub for the maritime industry. Payscale.com rates SUNY Maritime College as one of the best colleges for return on investment. SUNY Maritime College boasts one of the lowest tuitions of any college while yielding one of the highest mean salaries of graduates among all colleges and universities.

The Master of Science in International Transportation Management is a logistics, supply-chain, and inter-modal program. International transportation management is a 34-credit program that prepares students for advanced positions within the maritime industry, as well as in logistics and supply chain management positions. The program may be completed online, on campus or a blend of the two formats, to make it fit with a variety of schedules and learning preferences. Students may choose to earn additional certificates in charter parties or supply chain management, as well as a U.S. Coast Guard third mate's unlimited license.

The Master of Science in Maritime and Naval Studies is a humanities focused program for those that have a passion for the sea. Literature, history, art, music, law, and environmental issues comprise this unique and wonderful opportunity. The program can be completed entirely online and is 31 credits.

Trident Seafoods

5301 Shilshole Ave NW

Seattle, WA 98221

<https://www.tridentseafoods.com/>

- Stephanie Anderson
Talent Acquisition Partner
425.529.8640, sanderson@tridentseafoods.com

In this family-owned company, we know and love seafood

When your family sits down together, we want you to know the family who brought you this seafood. Our company was founded by Chuck Bundrant, a fisherman who made his livelihood from Alaska's bountiful oceans. Now three generations of Chuck's children and grandchildren are committed to sharing this abundance by producing seafood products that are delicious, convenient, and sustainable.

Catching fish isn't just our business. It's our livelihood. It's our calling. We are all fishermen here, and catching the purest and healthiest seafood is what we do — it's what we've done for more than 45 years. And if we stay true to our beliefs in protecting the oceans where we fish, it's what we'll be doing 45 years from now, too.

We don't answer to investment bankers like some other seafood companies. We only answer to our fishermen, our employees and our customers.

From our family to yours,
The Bundrant Family

Agility is key to survival in our rapidly changing global economy. The Paul Merage School of Business develops and equips leaders with critical business and leadership skills needed to succeed through programs that are continually adapted to address the ever-changing social, technological and economic opportunities and challenges in our digitally driven world. We offer four dynamic MBA programs, a Master of Professional Accountancy, Master of Finance, MS in Biotechnology Management, MS in Business Analytics, MS in Engineering Management, PhD, and undergraduate business degrees that focus on creative and critical thinking skills, strategic decision-making, leadership, innovation, and collaboration through in-class and on-site experiences with real-world business problems. While the Merage School is relatively young, it has quickly grown to consistently rank among the top 5% of all AACSB-accredited programs through exceptional student recruitment, world-class faculty, a strong alumni network and close relationships with both individual business executives and global corporations. We combine the academic strengths and best traditions of the University of California with the cutting-edge, entrepreneurial spirit of Orange County in the heart of Southern California's Tech Coast.

University of the Pacific, McGeorge School of Law

3200 Fifth Avenue

Young Brothers (YB) is Hawai'i's foremost interisland freight handling and transportation company. We serve individuals and businesses alike, moving goods by barge among the Hawaiian Islands. We are the only regularly scheduled common carrier authorized by the State of Hawaii to transport your goods over water from one island to another.

We can handle almost any shipment. Our fleet of eight barges has a combined capacity of over 60,000 tons, and our equipment can accommodate a range of capacity needs. From food and other refrigerated cargo, to building materials, equipment, and cars, we have a solution for every type of cargo.

We offer fast, frequent, and reliable service to the following ports: Nāwiliwili on Kaua'i, Kahului on Maui, Kaunakakai on Moloka'i, Kaunapali on Lāna'i, Honolulu on O'ahu, and Hilo and Kawaihae on the Island of Hawai'i. Most routes are serviced at least twice a week by overnight sailings.
