taylhele@amazon.com
- Ryan Storz, Data Center Chief Engineer
ryastorz@amazon.com
- Hank Allen, Data Center Chief Engineer
hankall@amazon.com
- Andrew Tyler, Data Center Chief Engineer
andrety@amazon.com

Launched in 2006, Amazon Web Services (AWS) began exposing key infrastructure services to businesses in the form of web services -- now widely known as cloud computing. The ultimate benefit of cloud computing, and AWS, is the ability to leverage a new business model and turn capital infrastructure expenses into variable costs. Businesses no longer need to plan and procure servers and other IT resources weeks or months in advance. Using AWS, businesses can take advantage of Amazon's expertise and economies of scale to access resources when their business needs them, delivering results faster and at a lower cost.

Today, Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world. With data center locations in the U.S., Europe, Singapore, and Japan, customers across all industries are taking advantage of our low cost, elastic, open and flexible, secure platform.

American Cruise Lines

California Department of Corrections and Rehabilitation

Booth #10

10000 Goethe Road
Sacramento, CA 95827
<http://joincdcr.com>

- Danny Royster, Recruitment Analyst/Event Coordinator
Danny.Royster@cdcr.ca.gov

You value integrity, professionalism, and safety, and want to dedicate your efforts to rehabilitation and restoration of your community -- a career as a Correctional Officer (CO) might be the job for you. A Correctional Officer spends most of their time interacting and interfacing with incarcerated individuals in a state prison environment. Our mission is to facilitate the successful reintegration of the individuals in our care back to their communities and equip them with the tools to be drug-free, healthy, and employable members of society. We do this by providing education, treatment, and rehabilitative programs, all in a safe and humane environment.

California Department of General Services

Booth #65

707 3rd Street
West Sacramento, CA 95605
www.dgs.ca.gov

- Shannon MacGregor, Recruitment Manager
279-946-8330, shannon.macgregor@dgs.ca.gov
- Austin Wagers, Recruiter
austin.wagers@dgs.ca.gov

DGS serves the public by providing a variety of services to state agencies through procurement and acquisition solutions; real estate management and design; environmentally friendly transportation; professional printing, design and web services; administrative hearings; legal services; building standards; oversight of structural safety, fire/life safety and accessibility for the design and construction of K-12 public schools and community colleges; funding for school construction; and disability access.

The California Highway Patrol offers challenging and exciting careers in the field of law enforcement. If you are interested in diversity, challenges, and opportunities, the CHP invites you to apply to become a part of our professional organization. We remain competitive and current with training and technology, keeping the citizens of California safe. We have many employment opportunities, and we invite you to look into the California Highway Patrol for your future. The Department provides an excellent salary, full medical benefits, and a defined benefits retirement program.

California State Auditor

Booth #93

621 Capitol Mall, Suite 1200
Sacramento, CA 95814
<https://www.auditor.ca.gov>

- Isabella Nicolaides, Strategic Engagement Specialist
916-445-0255, ext. 146, IsabellaN@auditor.ca.gov

We are the independent oversight arm of the California State Legislature, the custodians of California's Whistleblower Hotline, and catalysts for positive change in our state!

When a legislator or a member of the public reports concerns about another state or local government organization, our Performance/Policy Evaluators step in to conduct investigations, discover evidence, publicly report the truth, and recommend changes.

When it's time for state and local government to account for billions of taxpayer dollars spent, and when high-risk government financial systems need improvement, our Financial Auditors conduct some of the world's largest financial reviews and provide much-needed guidance to struggling organizations and economies.

Our work is in service to all Californians, and we are trusted to produce unbiased, independent, nonpartisan reports that hold government accountable to the people it serves.

Our office is a DEI-focused, hybrid telework environment, with competitive starting salaries and amazing state benefits including 4+ weeks of annual PTO! Best of all, we provide a dynamic, challenging, and rewarding career that makes a huge difference for our state!

Calpine Corp.

Booth #59

717 Texas Avenue, Suite 1000
Houston, TX 77002
www.calpine.com

- Chris German, VP Regional Operations
- Kevin Karwick, General Plant Manager
- Drew Yarbrough, Manager Maintenance
- Julie Venierakis, Human Resources Manager

Calpine Corporation is America's largest generator of electricity from natural gas and geothermal resources with operations in competitive power markets. Our fleet of 78 power plants in operation and under construction represents approximately 26,000 megawatts of generation capacity. Through wholesale power operations and our retail businesses, we serve customers in 23 states, Canada and Mexico. Our clean, efficient, modern and flexible fleet uses advanced technologies to generate power in a low-carbon and environmentally responsible manner.

Our company was established on the premise that a strong commitment to the environment is inextricably linked to excellence in power generation and corporate responsibility. Since its founding in 1984, Calpine has led the power industry in its unwavering commitment to environmental stewardship. In addition, our renewable geothermal plants use steam generated deep below the earth's surface to produce clean, renewable electricity.

CSC Vision

Chevron Shipping is a world-class marine services company and a global leader in safety and sustainability. Our talented and empowered workforce enables higher returns across Chevron by providing cost-competitive marine transportation, managing marine risk, and delivering marine functional expertise.

Right People for Marine Solutions

Since building our first tanker in 1895, we have evolved into a world-class global marine services company, specializing in oil and gas marine solutions. We provide safe, reliable and cost-competitive marine transportation and expert technical, commercial and marine operations support to Chevron's customers and affiliates worldwide. In addition, Chevron Shipping Company is ISO 14001:2015 certified for the management of Chevron's operated fleet vessels.

Who We Are

We currently employ 1,625 seafarers and 325 shore-side personnel dedicated to supporting Chevron's marine requirements. Our operated fleet consists of conventional crude tankers and product carriers, as well as high-technology ships and liquefied natural gas (LNG) carriers. Shore-side staff provide critical marine functional support, with marine specialists embedded within Chevron business units in 20 different countries.

CriticalArc

Booth #64

2647 Gateway Road, Suite 105-485
Carlsbad, CA 92009

Founded as Edison Chouest Boat Rental in Galliano, Louisiana, in 1960, the Edison Chouest Offshore companies (ECO) are recognized today as the most diverse and dynamic marine transportation solution providers in the world. ECO operates a growing fleet of well over 200 vessels, ranging from 87 to over 525 feet in length, serving an expanding global customer base.

Staying on the forefront of new technologies is an integral part of the Chouest business plan, as evidenced by recent advances in the areas of subsea support, integrated bridge systems and global communications.

The ability to design, build, own and operate diverse, high-capacity and technologically superior vessels has made ECO an unrivaled leader in the maritime industry.

Enterprise Holdings**Booth #51**

2633 Camino Ramon, Suite 400
San Ramon, CA 94945

<http://www.go.enterpriseholdings.com/>

- Stephanie Wittler, Talent Acquisition Manager
510-364-1403, stephanie.a.wittler@ehi.com

Enterprise Holdings is a leading mobility solutions company worldwide. It features a comprehensive network of brands and independent regional subsidiaries, which offer car and truck rental, vanpooling and carsharing services, car sales, fleet management and much more.

What began with a small fleet of cars in 1957 has expanded to a network of mobility solutions that serves customers in more than 90 countries and territories around the world.

Over the years, we've learned moving forward isn't a simple matter of going from point A to B. Today, mobility is the movement of people and goods. It goes beyond the vehicles we drive to encompass an integrated way of travel that meets every individual's unique needs and preferences.

That is why it's our vision to be the world's best and most trusted mobility company. As mobility continues to evolve, we'll continue to innovate to work toward a reimagined mobility future that is more accessible, efficient and sustainable for all.

713-208-6954, agustin.colchado@genlp.com
- Brian Teste, Director, Offshore Marine Operations
713-560-5234, brian.teste@genlp.com

Genesis Marine is safe, reliable and efficient with the right equipment for your marine transportation needs. We primarily serve refineries and storage terminals along the Gulf Coast, East Coast, Canada, Great Lakes, Intracoastal Canal and western river systems of the United States, including the Red, Ouachita and Mississippi Rivers on which Genesis has significant existing terminals.

Genesis Marine owns and operates two fleets, inland and offshore, including approximately 130 vessels. Our state-of-the-art barges coupled with the best liquid cargo mariners make us the safest, most efficient carrier of inland, hot-oil cargoes. Our inland fleet consists of approximately 82 barges and 33 push-boats and our offshore fleet consists of nine boats and nine barges and one ocean going tanker. We have a total design capacity of 2.3 mmbbl for Inland Marine Operations, 0.9 mmbbl for Offshore Marine Operations and 0.3 mmbbl for the M/T American Phoenix (ocean-going tanker).

We provide a safe and competitive service, adhering to strict operating procedures which are designed to not only meet, but also exceed customer & regulatory requirements.

Lafayette, LA 70503
www.guiceoffshore.com

- Tiffany Bourque, Personnel Manager
tiffany@gomarineservices.com
- Asa Moss, Operations
asa.moss@guiceoffshore.com

GUICE OFFSHORE ("GO"), A MARINE VESSEL TRANSPORTATION COMPANY, WAS FOUNDED IN MAY 2009 AND IS WIDELY CONSIDERED TO BE THE US FLAG LEADER IN THE OPERATION OF DYNAMICALLY POSITIONED MINI SUPPLY VESSELS AND COMPACT, COST EFFECTIVE MULTI-PURPOSE VESSELS FOR THE "SPECIALTY" MARKETPLACE.

GO regularly provides vessel and technical services to a broad spectrum of critical industries like aerospace, documentary and film; oil and gas; government and military; environmental and disaster response and recovery; inspection, maintenance and repair (IMR); science and research; salvage; geotechnical and surveys; and offshore wind and renewable energy. Our culture is customer driven with a strong "Can Do Safely" mentality; we address our clients' needs with a technical approach, enhanced vessel capabilities and experienced crews. Our goal is to consistently deliver safe, reliable and cost-effective service.

Harbor Industrial / Dockside Machine & Ship Repair

Booth #75

211 North Marine Avenue
Wilmington, CA 90744
<https://harborindustrial.com>
<http://docksidemachine.com/index.html>

- Vanessa Stager, Executive Administrator

Harbor Industrial - Our team is composed of Service Engineers and Technicians with diverse disciplines in Industrial, Mechanical, Electrical, Automation, Structural Welding and Marine Engineering Services. We pride ourselves on our excellent safety record and our unequalled technical, engineering and managerial support. Through our mechanics, welders and technicians, our work encompasses both hardware and software throughout the entire life cycle of any project.

We believe in Quality Practices and have strong beliefs as evidenced in our commitment to Quality Practices.

Dockside Machine & Ship Repair - We have the team, the equipment and the expertise for efficient (emergency) service on both diesel and steam powered ships. We have been in the business for over 55 years and are located in the heart of Los Angeles and Long Beach harbor. Rely on us for rush and emergency jobs. We operate on a around the clock basis, seven days a week. Maintaining a fleet of trucks, portable welding machines and equipment for shipboard services. Backed by a fully equipped machine shop, welding fabrication shop, hydraulic shop and an insulation shop.

Depend on us to complete a job with the least number of men and man-hours. Dockside has a cadre of experience licensed marine engineers and skilled machinists, welders, and electricians. Our labor force is the largest in the area that can be readily deployed to meet all Ship Repair & Maintenance needs.

Harvey Gulf International Marine

<https://bridgedeck.org/>

- Melany Skippen
West Coast Port Agent
410-855-2441, mskippen@bridgedeck.org

MM&P represents: US-Coast Guard licensed masters and mates on US-flag commercial vessels on international voyages, on the inland waterways and on civilian-crewed ships in the federal government fleet; masters, mates and other marine personnel who work on tugs, ferries, dredges and harbor tour vessels throughout the United States, including in the San Francisco Bay, on New York City ferry systems and state ferry systems in Alaska and Washington State.

JT Marine Inc.**Booth #20**

2501 SE Hidden Way
Vancouver, WA 98661
<http://jtmarineinc.com/>

- Timo Toristoja, Owner
360-750-1300, Timo@jtmarineinc.com
- Joseph Patron, Business Development
360-750-1300, jpatron@jtmarineinc.com
- Irene Toristoja, Controller
360-750-1300, irene@jtmarineinc.com

JT Marine Incorporated (JTM) is a small shipyard with the ability to deliver projects under strict timelines while maintaining quality and complete customer satisfaction. JTM's fundamental belief is that you do not need to be a giant of industry to do giant things. By maintaining a well-trained and loyal workforce and tight bonds with subcontractors, JTM can maintain a small business mentality and produce large business projects. By focusing on what JTM does best, structural fabrication and project management, we are able to minimize project and company overhead. This allows for out of the box approaches to project planning and execution and streamlined communication. Bottom line, JTM does more with less and delivers every time.

Kirby Marine**Booth #49**

Military Sealift Command

Booth #11

CIVMAR Support Center

9276 3rd Avenue, LP-26

Norfolk, VA 23511

www.sealiftcommand.com

- Eric Simpson, Recruiter
757-341-4611, erics@sealiftcommand.com

Our Mission

The U.S. Navy's Military Sealift Command is the premier provider of ocean transportation to the Department of Defense. The Command operates approximately 125 civilian-crewed ships that replenish U.S. Navy ships, conduct specialized missions, strategically preposition combat cargo at sea around the world and move military cargo and supplies used by deployed U.S. forces and coalition partners.

While we do play a critical role in support of our nation's defense, our employees are not active duty members of the military. MSC civil service mariners (CIVMARs), the largest segment of our global workforce, are federal civil service employees.

- Khalilah Durias
khalilah.c.durias.civ@us.navy.mil

NSWC PHD is a dynamic, diverse and innovative workplace supporting the U.S. Navy's fleet combat and weapons systems by providing highly skilled personnel and state-of-the-art facilities to lead the development and support of Navy surface ship warfare systems throughout their life cycle. NSWC PHD focuses its technical capabilities on providing direct technical engineering and product support to the Fleet and strives to improve the next generation of in-service engineering to take advantage of advances in technology, which involves direct connectivity to the Fleet on a global basis and the immediate availability of around-the-clock access to products, services and Fleet-support capabilities.

NOAA Office of Marine and Aviation Operations

Booth #31

439 West York Street
Norfolk, VA 23510
<https://marinerhiring.noaa.gov/>

- Carol Martin, Professional Mariner Recruiter
240-472-9806, carol.martin@noaa.gov
- Chris Nichols, Professional Mariner Recruiter
228-627-9230, charles.c.nichols@noaa.gov

The National Oceanic and Atmospheric Administration (NOAA) operates a wide assortment of hydrographic survey, oceanographic research and fisheries survey vessels. These vessels are operated by NOAA's Office of Marine and Aviation Operations.

The ships are run by a combination of NOAA commissioned officers and civilian professional mariners. The civilian mariners include licensed masters, mates and engineers, and unlicensed members of the engine, steward and deck departments. In addition, survey and electronic technicians operate and/or maintain the ship's mission, communication and navigation equipment. The ship's officers and crew provide mission support and assistance to embarked scientists from various NOAA laboratories as well as the academic community.

Purchasing Manager
925-296-2000, Jenna.Ross@patriotships.com

Patriot Maritime, LLC is a leading maritime contractor to the U.S. Government, managing and operating vessels. Patriot Maritime currently manages seven Ready Reserve Force (RRF) ships for the United States Maritime Administration (MARAD); eight Watson class Large Medium Speed RO-RO vessels for the United States Navy, Military Sealift Command (MSC); a shallow draft tanker for Schuyler Line Navigation Company, and our own tanker the Haina Patriot.

Pearl Harbor Naval Shipyard

Booth #58

667 Safeguard Street, Suite 100

JBPHH, HI 96860

<https://www.navsea.navy.mil/Home/Shipyards/PHNS-IMF/>

- Leslie Bovaird, Lead Nuclear Engineer and Recruiter
808-368-0171, leslie.bovaird@navy.mil

The U.S. Navy officially established Navy Yard Pearl Harbor in the Hawaiian Islands as a mid-Pacific coaling and repair station on May 13, 1908. Hawaii's strategic location ensured the nation a vital waypoint and defensive outpost between the U.S. mainland and the rest of the Asia-Pacific region.

The Shipyard's transformation from this modest station to a world-class Navy complex mirrored the global influences of the region as the area continued to catalyze world events. This geographic "perch" on the western-most edge of American territorial interests gave the U.S. a platform to secure sea lanes of communication and commerce, effectively projecting power across the expansive Pacific and Indian oceans.

Generations of Shipyard workers have witnessed more than a century of war, conflict, and evolving global interests from this critical geographic vantage point. Our men and women strengthened our nation's rise from an historic attack on their homeland to provide pivotal support and a hard-fought victory in World War II, earning the motto "We Keep Them Fit to Fight." Shipyards also supported the fleet in the Korea conflict, the Vietnam War, the Cold War, the Gulf War, in combat operations in support of ground forces in Iraq and Afghanistan, and in a myriad of international affairs today. Paralleling these historic milestones, the Shipyard supported the seafaring transition from sail to steam to nuclear power, and helped our Navy progress from the industrial revolution to today's cutting-edge information-technology domain.

Today, the nation reaffirms the Asia-Pacific region as central to global economic development and geopolitical stability in the 21st century. The president and secretary of defense pursue a strategic rebalance to the Asia-Pacific region, and the U.S. military continues to increase its role in cooperative security efforts and concentrate its operational focus on the area. These re-balancing actions thrust Pearl Harbor Naval Shipyard into a leading support role as the Navy relocates 60 percent of its forces to the Pacific.

The men and women of Pearl Harbor Naval Shipyard & Intermediate Maintenance Facility (PHNSY&IMF) continue the resilient lineage of Shipyards who have given their blood, sweat and determination in defense of our nation. They are dedicated professionals who repair, maintain and modernize the U.S. Pacific Fleet, while they contribute to the economic and social well-being of the state of Hawaii. They share values of honor, courage, commitment and aloha. And while our nation's defense budget remains constrained and regional interests intensify, PHNSY&IMF endeavors for our "No Ka 'Oi" Shipyard to be recognized as the superior maintenance provider in the Pacific. As our nation's largest, most comprehensive fleet repair and maintenance facility between the U.S. West Coast and the Far East, we will continue to build upon our time-tested foundation. We will provide a capable, ready and "Fit to Fight" fleet, as one of our nation's leading strategic assets in the Asia-Pacific theatre.

Sause Bros. provides a full range of services: from ocean towing, cargo handling, and ship assist, to marine construction and repair.

Scripps Institution of Oceanography

Booth #93

Nimitz Marine Facility

297 Rosecrans Street #3505

San Diego, CA 92106

<https://scripps.ucsd.edu/ships/marine-facility>

- Lindsay Long, Marine Crew Recruiter/Scheduler
858-534-0579, l1long@ucsd.edu

The Nimitz Marine Facility (MarFac) is the home port and technical support center for the Scripps oceanographic research fleet. MarFac can berth up to seven ships at a time, plus the research platform FLIP, along our 110-meter finger pier and 85-meter quay wall, with complete support for cold-iron berthing including power, potable water, telecoms, broadband, and other key utilities.

The waterfront vessel berthing facilities — wharf, pier, and all utilities — were replaced and revitalized in 2016 to enable the next century of ocean research. Protection of the environment is part of our mission, and MarFac hosts a variety of programs to promote sustainable programs and minimize our impact while strengthening our ability to support expeditionary research.

Located on Point Loma in San Diego Bay, the six-acre MarFac campus serves as the logistical and technical support hub for Scripps's worldwide ocean research program. The administrative offices of our Ship Operations & Marine Technical Support are located at MarFac, along with with machine shops, instrument repair and calibration facilities, scientific staging and short-term storage areas, shipping/receiving facilities and a host of other specialized capabilities that support Scripps ocean research around the globe.

MarFac sometimes also serves as a point of embarkation or debarkation for academic research cruises staged aboard vessels operated by other institutions within the University-National Oceanographic Laboratory System (UNOLS), should they visit San Diego.

Shaver Transportation Company

Siemens Industry, Building Technologies, Automation

We spend up to 90% of our lives in buildings, and we believe that everything people do in life deserves a perfect place to do it. In a world where our fundamental health, safety and wellbeing expectations have been deeply

impacted with the anxiety of a new virus, buildings should offer a haven. Ideally, a perfect place to grow, learn and prosper.

While it's true today's buildings should be reliable, efficient and safe - these characteristics alone don't enable businesses and empower people the way a true smart building can. Adaptability is crucial. Smart buildings interact with people, systems and external elements around them. They learn from the past experiences and real time data input. They adapt to the needs of people and the businesses within them by increasing comfort, efficiency, resiliency and safety.

Whatever the size of the building, its purpose or application: Our comprehensive building automation and control systems portfolio allows us to perfectly tailor an automation and control solution to each project's individual needs. Openness and flexibility are the bottom line for all of our systems. As a result, open communication protocols enable their easy integration with other systems and the option to modernize later on. Combining electrical and HVAC systems in a comprehensive, multiple discipline approach and designing for reliability - this is how perfect places become a reality.

Snow & Company

- Rachel Severyns, Vessel Staffing Assistant, Human Resources
206-297-5800, rseveryns@tridentseafoods.com

Trident Seafoods Corporation is the largest vertically-integrated seafood company in North America. Trident is engaged in year-round fishing and processing of many species of seafood throughout the Bering Sea, Gulf of Alaska and Bristol Bay areas.

What sets Trident apart from its competition is the commitment we make to know our ocean, know our fishermen, know our fish, and enhance the value of our products "from the source to the plate." Our commitment is more than an understanding of our supply chain; it's a series of multi-million-dollar investments made in remote communities to provide clean, efficient primary processing operations and critical fleet support services along thousands of miles of rugged Alaska coastline from Ketchikan to Kodiak . . . from Sand Point to St. Paul.

Vistra (NYSE: VST) is a leading Fortune 500 integrated retail electricity and power generation company based in Irving, Texas, providing essential resources for customers, commerce, and communities. Vistra combines an innovative, customer-centric approach to retail with safe, reliable, diverse, and efficient power generation. The company brings its products and services to market in 20 states and the District of Columbia, including six of the seven competitive wholesale markets in the U.S. and markets in Canada, as well. Serving nearly 4.3 million residential, commercial, and industrial retail customers with electricity and natural gas, Vistra is one of the largest competitive electricity providers in the country and offers over 50 renewable energy plans. The company is also the largest competitive power generator in the U.S. with a capacity of approximately 39,000 megawatts powered by a diverse portfolio, including natural gas, nuclear, solar, and battery energy storage facilities. In addition, Vistra is a large purchaser of wind power. The company owns and operates the 750-MW/1,600-MWh battery energy storage system in Moss Landing, California, the largest of its kind in the world. Vistra is guided by four core principles: we do business the right way, we work as a team, we compete to win, and we care about our stakeholders, including our customers, our communities where we work and live, our employees, and our investors.

Yusen Terminals LLC ("YTI", based in Terminal Island (Los Angeles), CA, is a joint venture of NYK Line and Macquarie Infrastructure Partners III, with headquarters' office in Tokyo, Japan and Sydney, Australia, respectively.

YTI operates a state-of-the-art marine container terminal in the Port of Los Angeles. YTI was established in 1991 at the Port's Berths 212-218. The services we provide are stevedoring and terminal operations for The Alliance (ONE, Hapag Lloyd, HMM and Yang Ming) as well as slot chartering from Evergreen, CMA-CGM, APL, COSCO and OOCL. As a full-service marine terminal, YTI provides modern technology, equipment, on-dock rail, storage facilities and Alternative Maritime Power (AMP®). YTI's highly experienced management team are dedicated to efficient cargo handling with a focus on service delivery and customer satisfaction. We currently operate eleven, Post Panamax Gantry cranes including six, state-of-the-art Super Post Panamax Gantry cranes. YTI is committed to giving all our customers a reliable "Best-in-Class" service delivery as well as a complete suite of marine terminal services to the shipping and transportation community.
